SKILLS

Languages: HTML5, CSS3, JavaScript

Technologies: React, Redux Toolkit, RTK Query, Tailwind, Material UI, GitHub, Git, Socket.io, Webhooks, Stripe APIs, Open-AI Api's

EXPERIENCE

- 5/2024 – present **Software Developer** wedigtech
- **Led Front-end Development for Blue-Sky-Intel** : Independently handled the React-based portal of a multi-user platform connecting Business Users, Solution Providers, and Investors, ensuring seamless user experiences.
 - **Advanced API Integration** : Implemented OpenAI API to dynamically generate tailored questionnaires, enabling businesses to find relevant solution providers based on their responses and in order to manage other api's in redux implement RTK Query.
 - **Real-Time Collaboration Features** : Developed a Kanban board with drag-and-drop functionality and real-time chat powered by Socket.io, fostering effective collaboration between users.
 - **Scalable Architecture and State Management** : Utilized Redux Toolkit and Redux Persist for state management, enhancing performance and ensuring consistent user experiences across sessions.
 - **Subscription and Role-Based Features** : Designed and implemented subscription-based access control with tiered plans (Lite, Plus, Pro). Integrated Stripe API and Webhooks for seamless payment processing and subscription management. Developed team collaboration tools with role-specific functionality, ensuring a scalable and secure platform.
- 2/2024 – 4/2024 **Full-Stack Developer Intern** wedigtech
- Collaborated with senior developers to gather and refine project requirements and objectives.
 - Integrated the Fortune React Sheet into "Backrr," a real-world investment application, enabling advanced spreadsheet functionality such as real-time data saving, column freezing, and formula toggling.
 - Enhanced "Backrr" with features like fullscreen toggle and Excel sheet downloads, contributing to seamless team-driven integration efforts at Wedigtech.

PROJECTS

- 5/2024 – present **BlueSky Intel (AI & Blockchain Intelligence Platform)** <https://www.blueskyintel.com/>
- Designed and developed the React-based portal, connecting Business Users, Solution Providers, and Investors, with features like tailored questionnaires and advanced collaboration tools.
 - Implemented state management using Redux Toolkit and Redux Persist, integrated OpenAI APIs for dynamic content generation, and utilized Socket.io for real-time chat and Kanban boards.
- 3/2025 – present **WeTeams (Project & Resource Management Tool)** <https://weteams.ai/>
- Developed a smart project management platform using React.js, Redux Toolkit, and RTK Query. Refactored the codebase and integrated Jira and Asana APIs to track employee hours, sprint progress, and resource allocation.
 - Empowered managers with actionable reports and team performance insights.
- 2/2024 – 4/2024 **Real Time Angel Fund (Backrr)** <https://www.realtimeaf.com/>
- Integrated advanced spreadsheet functionalities using the Fortune React Sheet, enabling features such as real-time data saving, column freezing, formula toggling, and Excel sheet downloads, enhancing the investment management workflow.
 - Collaborated with senior developers to implement responsive web interfaces, improve user experience, and strengthen authentication systems for a secure and seamless application.

EDUCATION

- 11/2023 – 02/2024 **Web Development** Odin School
- 08/2019 – 10/2022 **Bachelors in Science** University Of Kota
