SUMMARY

Software Developer skilled in modern technologies, quick to grasp requirements, and proficient in **delivering user-focused solutions**. Follows **Agile principles** to ensure efficient development, seamless functionality, and continuous improvement.

SKILLS

Languages: **HTML5**, **CSS3**, **JavaScript**

Technologies: **React**, **Redux Toolkit**, **RTk Query**, **Tailwind**, **Material UI**, **Git**, **Socket.io**, **Webhooks**, **Stripe**, **Open-AI**, **Zoho CRM**, **Jira**

EXPERIENCE

5/2024 – present   **Software Developer**   **wedigtech**

- **Front-end Development for Blue-Sky-Intel :** Independently handled the React-based portal of a multi-user platform connecting Business Users, Solution Providers, and Investors, ensuring seamless user experiences.
- **Advanced API Integration :** Implemented **OpenAI API** to dynamically generate tailored questionnaires, enabling businesses to find relevant solution providers based on their responses and in order to manage other api's in redux implement **RTK Query**.
- **Real-Time Collaboration Features :** Developed a Kanban board with drag-and-drop functionality and real-time chat powered by **Socket.io**, fostering effective collaboration between users.
- **Subscription and Role-Based Features :** Designed and implemented subscription-based access control with tiered plans (Lite, Plus, Pro). Integrated **Stripe Subscription APIs** and **Webhooks** for seamless payment processing and subscription management.

2/2024 – 4/2024   **Full-Stack Developer Intern**   **wedigtech**

- Collaborated with senior developers to gather and refine project requirements and objectives.
- Integrated the Fortune React Sheet into "Backrr," a real-world investment application, enabling advanced spreadsheet functionality such as real-time data saving, column freezing, and formula toggling.
- Enhanced "Backrr" with features like fullscreen toggle and Excel sheet downloads, contributing to seamless team-driven integration efforts at Wedigtech.

PROJECTS

5/2024 – present   **BlueSky Intel (Saas Platform for AI & Blockchain Intelligence)**   **blueskyintel.com**

• Designed and developed the React-based portal, connecting Business Users, Solution Providers, and Investors, with features like tailored questionnaires and advanced collaboration tools.
• Implemented state management using **Redux Toolkit** and **Redux Persist**, integrated **OpenAI API** for dynamic content generation, and utilized **Socket.io** for real-time chat and Kanban boards.

3/2025 – present   **WeTeams (Saas Platform for Project & Resource Management Tool)**   **weteams.ai**

• Developed a smart project management platform using React.js, Redux Toolkit, and RTK Query. Refactored the codebase and integrated **Jira** and **Asana APIs** to track employee hours, sprint progress, and resource allocation.

2/2024 – 4/2024   **Real Time Angel Fund (Fintech)**   **realtimeaf.com**

• Integrated advanced spreadsheet functionalities using the Fortune React Sheet, enabling features such as real-time data saving, column freezing, formula toggling, and Excel sheet downloads, enhancing the investment management workflow.
• Collaborated with senior developers to implement responsive web interfaces, improve user experience, and strengthen authentication systems for a secure and seamless application.

EDUCATION

11/2023 – 02/2024   **Web Development**   **Odin School**

08/2019 – 10/2022   **Bachelors in Science**   **University Of Kota**
